## Wise-Integration Tackles Global Expansion with Series B funding

Wise-Integration, a French innovator in gallium nitride (GaN) solutions for power supplies, successfully closed a Series B funding round, raising €15 million (about \$16.3 million). Applied Ventures-ITIC Innovation Fund also joined in this round of investment.

Wise-Integration joined Garage+ in 2021 and set up their Taiwan office at Garage+ working space.

MEandMine, one of Garage+ alumni startups focusing on children's emotional education, combines the power of neuroscience and gamification to provide innovative digital tools to promote students' mental health and create quality classroom environments, leading a groundbreaking revolution in early intervention for children's emotions.

# Newsight Imaging, an Israeli Semiconductor Startup, Wins IC Taiwan Grand Challenge with Revolutionary NSI5900 Sensor

Israeli semiconductor startup Newsight Imaging, a fellow of ours in 2018, wins IC Taiwan Grand Challenge with its revolutionary NSI5900 sensor, an advanced CMOS image sensor chips for 3D machine vision and spectral analysis.

This achievement will foster collaborations between Newsight Imaging and Taiwanese technology industries, especially in Industry 4.0.

# Chilean Startup qScire Partners with Global Semiconductor Giant TSMC

Chilean startup qScire, a fellow of ours in 2023, has secured a partnership with Taiwan Semiconductor Manufacturing Company (TSMC), the world's leading semiconductor manufacturer. The agreement allows TSMC to utilize qScire's innovative software in its chip production process.

qScire's technology focuses on calculating electrical resistance in nanoscopic structures considering quantum mechanics effects. The startup received funding from three angel investors and validated its technology through a research agreement with Applied Materials.

# Carbon Mobile Collaborates with Logitech on Sustainable Carbon Fiber Development

German startup Carbon Mobile, selected for Garage+ Spring Batch 2024, partners with Logitech to develop sustainable carbon fiber materials following their June meeting arranged by Garage+.

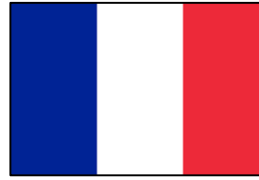

Carbon Mobile's unique IP solves the issues of carbon fiber unlocking integration into electronics-enabled industries. The materials also push beyond the limits of sustainability, enable less carbon footprint and less e-waste for electronics.

This October, under the assistance from Garage+, the founder, Firas Khalifeh, also successfully obtained Taiwan's entrepreneur visa.

# Semiconductor

- Secured investment from MediaTek and Seiko Epson, both are member companies of Epoch Foundation

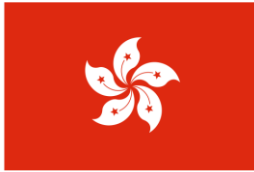

- Signed strategic partnership with TSMC and EDOM
- Established branch office in Taiwan

- Established partnership with First International Computer (FIC) for 3D visual system solution development

# Supply Chain & Manufacturing

- Cooperated with several Taiwanese companies, such as Gogoro, LiteOn, Inventec, Delta and Wistron

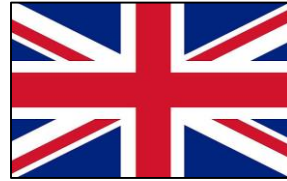

- Partnered with ASUSTOR
- Received US\$ 7.2M order from COMPUTEX
- Secured investment from Taiwan

- Secured investments from various enterprises, including Cathay Venture
- Collaborated with PChome

# 5G & IoT

- Established branch office in Taiwan
- Partnered with JABIL, Nvidia, Advantech, Grand Hyatt, and Marriott

- Established branch office in Taiwan

- Collaborated with Advantech for solution development
- Signed an MOU with FiduciaEdge Technology

# AI & Data Analysis

- Collaborated with Andes Technology to develop AI-powered applications

- Secured manufacturing support from Wistron
- Collaborated with HTC
- Established a branch office in Taiwan

- Cooperated with Wafer Works
- Conducted projects with Taiwanese local governments and universities
- Expected to establish a branch office in Taiwan

# Software / Hardware

- Collaborated with Quanta Computer and Acer to integrate their products

- Collaborated with 10+ Taiwanese companies, including Giant, Advantech, Compal, Gigabyte, etc.

- Received investments from Darwin Venture, a Taiwanese venture capital

# Healthcare

**LIFESENSE  
GROUP**

- Partnered with Megabona and IOHS for market development and secured investments

- Collaborated with Aaeon Technology to develop simulation robots

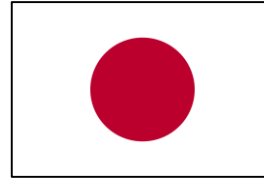

- Partnered with iXensor and MinAik Technology to produce key components

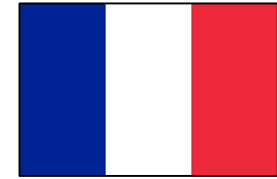

# Energy & ESG

- Signed a cooperation agreement with the World Vegetable Center in Taiwan

- Expected to established branch office in Taiwan

- Established branch office
- Collaborated with major laptop manufacturers and power supply suppliers in Taiwan

Garage+ has really been instrumental to help us to connect with local vendors and suppliers as well as some of the local investors and helps us to tap into the Taiwan industry ecosystem. As you know, for Hardware manufacturing startup, this is truly a great place to expand overseas business.

-Founder & CEO, Barmak Heshmat

**.NEARTHLAB**

South Korea

Garage+ is a very helpful program to us because I believe this is a great opportunity to be here in Taiwan as well as to be in APEC. And they are very beneficial to us for arranging all the great business meetings with potential business partners as well as strategic investors.

- Strategy & Corporate Development Lead, Jake Hwang

 **BLUMIND**

Canada

We are here to meet with potential customers, partners, and investors and Garage+ has done a phenomenal job connecting us with people in all of these domains. We've had some really productive meetings and look forward to doing a lot of business here in Taiwan. Taipei is the semiconductor capital of the world, and it's very appropriate for us to be here and engage with the vibrant semiconductor ecosystem of Taiwan.

- Co-Founder & COO, Niraj Mathur

# Fellow Endorsement

Canada

Garage+ has been essential for helping us launch into Taiwan, a critical place for us to be operating in the semiconductor and IC design industry. As an early startup, it's very hard to make those initial connections with key pilot partners and Garage+ has been essential for setting up not only investors but also potential customers. We highly recommend Garage+ for any startup looking to expand into Taiwan.

-Co-Founder & CEO, Brad Moon

Japan

The benefits of attending this program are that you can find sophisticated investors and corporate partners. As a deep tech startup, and many people in Taiwan understand technology, they can have a deep synergy with a deep tech startup.

- Founder, Hiroki Imabayashi

USA

What's gonna be very helpful for my company, as a hardware company, is building up a very strong supply chain. And you really don't have these opportunities to meet with high-level CTOs and decision makers at these large companies.

- CEO, Leaf Jiang

# Fellow Endorsement

wise-integration

France

We are very excited to be part of Garage+ Startup Program. I think this is one of the keys to our strategy development in Asia, especially in Taiwan. Since Wise Integration is a French tech company, lots of our potential customers are based in Taiwan.

- Co-Founder, Florian COUVIN

Israel

We think that Taiwan is an amazing bridge for any entrepreneurs in the world that want to go into mass production or small production with both very good quality. I think we have found something extremely interesting as an entrepreneur, technical, and businesswise.

- Co-Founder, Jeremie Brabet-Adonajlo

Chile

Garage+ has a very strong networking, they show us a lot of potential advisers, potential mentors, potential investors and potential clients. It's a very unique process, because they care about everything.

- CEO, Madeleine Valderrama
